In order to have access to the Microsoft azure services which we will use during the inhouse day we are kindly asking you to create a student account that provides you with the ability to try these tools yourself (not limited to the inhouse day).

Follow these steps to ensure you have the right azure student subscription:

1. Visit https://azure.microsoft.com/en-us/free/students/
2. Create a Microsoft account if you don't have one yet and subsequently login in with your Microsoft account. This does not necessarily have to be with your student email address
3. A screen similar to the picture shown below should appear. Submit the form with your TUD email address.

4. Follow the instructions in the email you received and check your status on the azure portal. If you select Cost Management + billing on the left side pane and you see something similar this the following picture you're all set!
